Art Unit: 1712

Allowable Subject Matter

The art rejection over Ichikawa et al. is hereby withdrawn in view of the amendment of claim 34 and the totality of Applicant's remarks.

It should be stated for the record that the Examiner is not in complete agreement that the mere disclosure of rheology control agent had been sufficient on its own to distinguish over the prior art. Indeed, a definition of rheological additives *provided by Applicant* discloses several effects that may be individually imparted by said additives. They are i) reduction of the viscosity, ii) increasing viscosity, or iii) a time dependent influence as with thixotropic agents. That is, Applicant's own definition would suggest that, while the term "rheological additive" embraces thixotropic agents, not all rheological additives are thixotropic agents. Claim 34 now stipulates that said agent is one that provides thixotropy. The Examiner concurs that, while the material stated to correspond to a rheological additive taken from the reference does, in fact, cause a viscosity change, it does not impart thixotropic character to the composition set forth in the reference hence the rejection is withdrawn.

A modified search of the prior art focused on identifying art that expressly disclosed this attribute in an ingredient of the composition or, alternatively, taught the specified materials (fish oil, cellulosics) in combination with the silane condensate, non-volatile solvent, and specified filler. No particularly germane documents were discovered. Likewise, the references deemed by the ISA as being especially relevant to the composition claims did not appear to even render obvious the instantly claimed invention.

Claims 21-33 remain allowable for the same reasons provided concerning the patentability of original claims 11-15 in the correspondence dated September 5, 2003.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
